

Washington Street Project Segments – Winter 2023

The original intent was to include the entirety of Washington Street from St. George Street to the Halls Corner intersection but this was not all inclusive in the original Prioritization Plan. Therefore, the Town is currently working to amend the Plan to more clearly establish the entire Washington Street corridor and identify all eleven (11) sidewalk project segments to be eligible for Complete Streets funding, including the six (6) projects currently in the Plan:

1. Sidewalk construction, Washington Street from Halls Corner/Washington Street to Harden Hill Road (Phase 1) and share the road signage and markings, Washington Street (Phase 1)
2. Sidewalk Construction, Washington Street from Harden Hill Road to Metcalf Way (Phase 2)
3. Sidewalk Construction, Washington Street from Metcalf Way to Shipyard Lane (Phase 3)
4. Sidewalk Construction, Washington Street from Shipyard Lane to Linden Lane (Phase 4)
5. Sidewalk Construction, Washington Street from Linden Lane to Freeman Place (Phase 5)
6. Sidewalk Construction, Washington Street from Freeman Place to Bayside Marine Corporation (Phase 6)

The Prioritization Plan will thus be amended to add the following five (5) projects:

7. Sidewalk Construction, Washington Street from Bayside Marine Corporation to Mattakeeset Court (Phase 7)
8. Sidewalk Construction, Washington Street from Mattakeeset Court to Long Point Lane (Phase 8)
9. Sidewalk Construction, Washington Street from Long Point Lane to Fort Hill Lane (Phase 9)
10. Sidewalk Construction, Washington Street from Fort Hill Lane to Bluefish River Bridge (Phase 10)
11. Sidewalk Construction, Washington Street from Bluefish River Bridge to St. George Street to (Phase 11)
