

**McGLONE ENTERPRISES INC.**  
SEPTIC SYSTEM ENGINEERING

Board of Health  
Town of Duxbury

Nov. 15, 2021

Dear Board Members,

It is the intention of **Ingrid Lindquist** to upgrade her On-Site Sewage Disposal System at **44 Josselyn Avenue**. Due to site restrictions, the following Local Upgrade Variances are hereby requested;

- 15.405 (1b)-  
A variance to allow a reduction in the required setback of S.A.S. to slab foundation from 10.0' to 5.0'
- 15.405 (1b)-  
A variance to allow a reduction in the required setback of Septic Tank to slab foundation from 10.0' to 7.0'

The following Local Variance is also hereby requested;

- 1.1 (1a)-  
A variance to allow a reduction in the required setback of S.A.S. to Wetland from 150' to 126'

I feel that this is the best solution for this very restricted site. This new system will be a considerable improvement over the current situation.

Thank you for your consideration in this matter.

Sincerely,

Shayne P. McGlone R.S.
