

Marshfield residents living on Prince Cir., Pioneer Trail, Settlers Path and Enterprise St. all receive water from the Duxbury Water Department. These residents will also receive a copy of this report.

The Massachusetts Water Management Act, enacted in 1985, limits the amount of water that the Town of Duxbury may withdraw from the ground. In addition to that limit, conservation expectations are defined, the average gallons per day used per person must be below 65 gallons. In 2019 the average Duxbury resident used 77 gallons, this was caused primarily by lawn and garden watering as seen on the Gallons Pumped Chart below. On July 5, 2019 Duxbury wells combined pumping was 3.28 Million Gallons, 3.5 times the amount pumped on an average winter day (0.93 MGD). Mandatory water bans are implemented from May to September to reduce outdoor watering.

**Please try to conserve water
May through September.**
