

Zero Carbon Zero Bills presented by David Green

TUESDAY, APRIL 12 @ 7:00—8:30 PM Zoom

David Green of Green Zero Carbon Home (<https://greenzerocarbonhome.com/>) will, in association with the Duxbury Free Library, Alternative Energy Committee and others, be presenting a free webinar the Zero Carbon Home April 12th, 2022, from 7:00 - 8:30 PM

Net-zero carbon homes save money, improve health and substantially cut emissions of carbon dioxide. Physicist and author David Green has cut the carbon dioxide emissions of his house (and pool) to zero, pays nothing for heating or electricity and his family's indoor air is clean and fresh. By following his “Fab Four” recipe you can do it too and help the country get to net-zero carbon by 2050. David did this by adding heat pumps, insulation, triple-glazed windows and solar panels (the “Fab Four”). By installing the Fab Four he is saving so much money on heating and electricity bills that his investments will pay for themselves in about six years.

To see a 3-minute interview of David Green by NBC Boston anchor Joy Lim Nakrin click here: [TV Interview](#)

Attend this free webinar to find out how you can live a carbon free life.

All attendees will receive a free copy of David's book *Zero Carbon Home* for iPad or Kindle.

This program is offered by the Duxbury Free Library in partnership with the Duxbury Bay Maritime School, Sustainable Duxbury, and the Duxbury Alternative Energy Committee.

Register for this webinar either through the Library or Eventbrite link:
