

Free COVID-19 Test Kits are now available at Town Hall – in the Board of Health Department and also on the first floor of Town Hall, The Duxbury Free Library and the Council on Aging.

The Town of Duxbury has received an additional 8,100 iHealth Labs at-home rapid antigen kits for the community from the Commonwealth of Massachusetts on January 3, 2023. These test kits are available throughout Town Hall as a first come, first served basis. Additionally, iHealth COVID-19 Antigen Rapid Tests have a new/extended expiration date per the U.S. Food and Drug Administration and each test kit available at Town Hall has a sticker with a website and QR code to give an accurate, extended expiration date.
