PACTV @ Duxbury Govt Channels Verizon 39 or Comcast 15

Remote @ www.zoom.us Webinar ID: 945 7805 3101 Passcode: 565677

Speakers:

James F. Begley, LSP

Mr. Begley is a Principal of MT Environmental Restoration and a Licensed Site Professional (LSP) in Massachusetts. He has over 30 years of professional experience in the fields of environmental science and engineering in the United States and abroad. Mr. Begley has managed complex environmental remediation projects for government and industry with a focus on effective assessments, evaluation of risk management options, remedial design and groundwater related technology development and demonstration. He is a former environmental regulator with MassDEP, and he has extensive experience in project management, negotiation, technical support for legal/enforcement cases, and public involvement activities.

Mark J. Benotti, Ph.D.

Dr. Benotti is a Senior Environmental Chemist with NewFields. He has over 20 years of experience in the fields of contaminant fate and transport and water treatment. Dr. Benotti manages a number of projects pertaining to per- and polyfluoroalkyl substances (PFAS) contamination at sites in the United States and abroad and is retained as an expert in a number of legal cases stemming from PFAS manufacture and use. He specializes in PFAS forensics, a dynamic and evolving field that aims to attribute and allocate environmental PFAS contamination to the originating source.
